

# Little Shepherd

Nurturing Young lives!

## Happy School

We are a committed team, dedicated in nurturing young lives!

## Healthy Food

We serve as much organic and natural food as possible.

## Natural products

We also provide organic or natural shampoo and toothpaste for the children.

## Green Environment

Children are exposed to green environment and eco education.

## About us....

Little Shepherd is a kindergarten that allows kids to learn and grow with value-based teaching methods.

We focus on CHARACTER BUILDING of the children using LIFE LESSONS through stories, games and most important of all, with all teachers and the team as the best role model to these children. Teachers and the team continue to learn and grow all the time, they are trained in Core Value Training.

1

Strong foundation in English Phonics so children are able to read and love reading as early as 4-5 year old.

2

Strong foundation in BM Suku Kata so children are able to keep up with the government school standard

3

Strong foundation in Chinese pinyin and bihua so students are able to match Chung Hua school standard.

Early childhood education has become very critical to children at this point as the world is going through rapid change.

What is the different between Taska & Tadika?

### Taska Program...

Taska is a Malay phrase that stands for “Taman Asuhan kanak-kanak” means Child care center or a nursery.

Our “Taska” program offer children from 15 months to 3 year old, we provide learning beyond just child care. The children will learn basic motor skills such as pouring, carrying and feeding themselves. Children learn how to interact and socialize with one another and the teachers. Taska prepares children for the Tadika program by introducing them to counting and the alphabet. Children in the full day Taska program are provided with healthy organic meals. They also have a nap Time and outdoors play time.

### Tadika Program...

Tadika is a Malay phrase that stands for “Taman didikan Kanak-kanak” means coaching or upbringing. Tadika program in Little Shepherd is different because we give our children the FOUNDATION for their education during their Taska day. Here is where the education began.

Tadika Children are taught to read and write along with science and mathematic topics, all with a purposeful, values-based approach to education. Through storytelling, hands on learning and practice, children are shown the wonders of the world and the amazing things they are capable of doing. Children are learning to treat one another with kindness and respect, we encourage teamwork and building one another. As we focus on Character building, we nurture children with basic values at their early childhood like understand the meaning of responsibility, patient, commitment, loving and developing their confident.

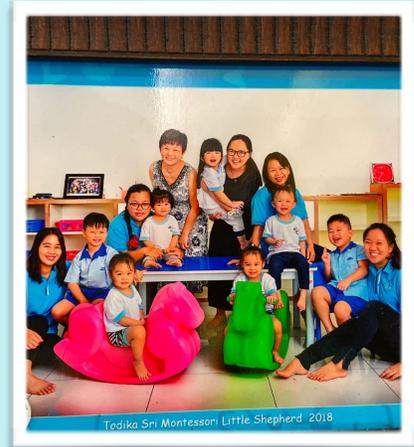

## “Small group learning, average 6-7 students per teacher”

We have dedicated and very committed teachers that have served in school for long term. Their focus is on giving the best to our children.

Lots of one to one time with each students in terms of academic guidance and character building.

### WORDS FROM LITTLE SHEPHERD TRAINER / ADVISOR

Continuous learning and growing as a team is critical especially now that the world is going through rapid and exponential change. It's important for us to lead the team and the children under our care in the direction of a future that's relevant to them. We strongly believe that growing them as leaders during their foundation years is critical, as they can discover who they are and apply these values for the rest of their lives. As a leader, their trainer and their advisor, it's important for me to be able to look forward and be able to prepare them and leading them in the right direction and into the future.

## Contact us.....

We are now accepting registrations for children of all ages.
